

*To begin...*

1. Turn on **POWER STRIP** (if it's not already on). **RECEIVER** and **VCR** should turn on automatically.
2. Turn on **COMPUTER**.
3. Turn on **PROJECTOR** using the **On** button on the **SHARP REMOTE**.
4. To change screen projection modes from **video** to **computer**, etc., use the **REMOTE**. Labels are ABOVE the buttons they correspond to.

<i>What do you want to project onscreen?</i> ▼	Settings:			
	AV Receiver	Extron Box	Remote Control	Notes
<b>Classroom computer</b>	IBM/Dell	1	PC1	To access Kinesiology network, double-click the <b>Kines Network Login</b> icon & log in.
<b>Laptop computer</b>	Portable Computer	4	PC1	1. Attach all cables and peripherals to the laptop <b>before</b> you turn <b>laptop</b> on. <b>Laptop owners must supply their own 15-pin VGA adaptor.</b> 2. Press <b>FN</b> (function) and <b>F7</b> (F8 on some laptops) until your image appears onscreen. 3. You <b>may</b> need to set laptop's screen resolution to <b>1024x768</b> . Go to <b>START &gt; SETTINGS &gt; CONTROL PANELS &gt; DISPLAY &gt; SETTINGS</b> .
<b>VCR/DVD player</b>	VCR/DVD	1	Video	

*Problems? Here's a checklist:*

1. Is the **POWER STRIP** turned on?
2. Are all **AV COMPONENTS** turned on?
3. Are all settings (as listed above) correct for what you want to project? *Please take a good look!*
4. Press the **Mute** button on the **REMOTE**:
5. Press the **Black Screen** button on the **REMOTE**.
6. Restart the **COMPUTER**
7. Turn everything (including the **POWER STRIP**) off, then on.

*Before you leave:*

1. **If you're logged in, just log out.**
2. If you're the last instructor of the day, please **shut down** computer and turn off **POWER STRIP** inside cabinet. Put away **REMOTE** and lock cabinet.

*Thank you!*
