

## Joining the GoGlobal site

**The GoGlobal CTools site is joinable. Follow these steps to join:**

1... Log into CTools (<http://ctools.umich.edu>)

2... If you are not already in **My Workspace**, open it by clicking the My Workspace tab, which is the left-most tab directly under the CTools logo.

3... Click **Membership** in the left-hand menubar.

You may or may not see a list of project sites and/or course sites under the heading "My Current Sites." These are sites to which you have been granted access by the owners of the sites.

4... To see a list of sites that you can join, click **Joinable Sites** along the top of the main window.

5... Click the **Join** button under a site's name to join it.

The site you joined will be added to the list of your current sites.

6... To open a site in your **Current Sites list**, click on the site's name.

If you experience problems, please contact [Sandy](#) to obtain access.
