

### **Kinesiology ICR Distribution Policy**

Grants submitted after February 1999 that have indirect costs dollars attached to them will result in 5% of the ICR being returned to the Principal Investigator (PI) of the grant. Note: PIs of multi-year grants that were active prior to February 1999 (during which the ICR being returned to the PI was higher than 5%) will have their recovery rates reduced by 10% annually (starting FY 1999-2000) until the existing grant expires or the amount reduces to 5%. The indirect costs recovered by the School will pay for lab support and maintenance as well as help grow the Kinesiology Graduate Program and support research efforts. (Approved 2/2/99, Executive Committee; 2/9/99, School Faculty Meeting.)
