

Kinesiology OVPR Cost Sharing Policy

For OVPR programs, securing matching funds or cost sharing from the unit, school/college, department or outside sources is viewed as an important sign of commitment to and support of the application. OVPR requires a minimum **50% match** for the total costs of the project. Non-allowable costs listed under funding restrictions (below) are not to be included in matching funds.

OVPR Funding Restrictions

In general, OVPR support is **NOT** available for:

- Travel to present at conferences
- Regular salary of faculty except as specifically indicated in program guidelines
- Computer/hardware /software for routine use
- Office equipment-telephone installations, photocopy machines
- Equipment maintenance costs
- Tuition support
- Requests for small amounts more appropriately handled at the unit level
- Projects that are primarily instructional
- Funds covering reduced external awards
- Retroactive funding, costs overruns or disallowances
- Faculty recruitment and start-up packages
- Page or reprint costs of articles in professional journals

When you develop your project budget, indicate the specific cost-sharing plan and submit that to the ADR with your application.

Please see the Grant Administrator for an example of a funded OVPR application.
