

Kinesiology Laboratory Space Policy

To the extent possible, lab space will be provided for every faculty member actively engaged in research. Keys to obtaining and keeping lab space include developing and maintaining a productive research program, seeking funding for research, and taking on and mentoring of students. Once allocated, if lab space is not used for a significant time, it will revert to the School. The School will implement a periodic review of use and justification of lab space. The exact mechanism (Executive Committee or one organized by EC) remains to be specified. (Approved 1/19/2001, Executive Committee.)
