University of Michigan Concussion Center
Doctoral Student Assistantship

Dr. Steven Broglio (Associate Dean and Professor in the School of Kinesiology; Director of the Michigan Concussion Center and NeuroTrauma Research Laboratory at the University of Michigan in Ann Arbor) is currently seeking a motivated Doctoral Student to work on research related to the long term effects of concussion starting Fall of 2022!

As one of the world's leading research institutions, the University of Michigan provides an exceptionally supportive environment for collaborative research. The Michigan Concussion Center is an interdisciplinary group of researchers and clinicians striving to maximize societal and individual health through the relentless pursuit of concussion knowledge. The Concussion Center maximizes its impact by facilitating the development and sharing of groundbreaking ideas that translate laboratory, clinic, and community observations into interventions that reduce concussion risk and improve outcomes in those affected by the injury. Our success is based on: Completing cutting-edge science by connecting and developing partners internal and external to the University; Applying innovative translational science to patient populations; Disseminating new information to relevant stakeholders at a local, state, national, and international level

Necessary Qualifications: Master’s and/or Bachelor’s degree in neuroscience, psychology, kinesiology or related field. The candidate must possess superior verbal and written communication skills, be strongly motivated, have a strong academic record, and work well in a team setting. Experience conducting research and programming (MATLAB, R, or similar) to manage large databases is a plus.

We are looking for curious, engaged students who have a strong desire to solve problems and are enthusiastic about learning how to do scientific research. The selected student will be expected to work collaboratively with a research team to collect and analyze data, prepare manuscripts for publication, and participate at national and international level scientific meetings

Students will need to apply and gain admittance to the University of Michigan School of Kinesiology doctoral program. The selected student will begin the PhD program in September 2022 and will be provided with full funding for tuition, stipend and health care (student/family) as a Graduate Student Instructor. For further information about Dr. Broglio and his ongoing research, please visit concussion.umich.edu. Please send inquiries to ConcussionCenter@umich.edu

Information about the Kinesiology Ph.D. program can be found at the School of Kinesiology PhD Admissions page. For further information about application requirements or how to apply, please contact Charlene Ruloff at cruloff@umich.edu Application deadline for Fall 2022 admission is December 1.
