To begin...

1. Turn on **POWER STRIP** (if it's not already on).
2. Turn on **RECEIVER** and **VCR** (if they aren't already on)
3. Turn on Sony **PROJECTOR** (if it's not already on), using the **Power** (green) button on the **REMOTE**.
4. To change screen projection modes from **video** to **computer**, etc., click the **REMOTE**'s **input** button (right under the **power** button).
5. Adjust audio volume using the **RECEIVER's volume knob**

What do you want to project onscreen? ▼	Settings:			
	AV Receiver	**Visualizer Switch**	**Extron Box**	**Notes**
Classroom computer	Dell/IBM	VCR/ Laserdisk	2	To access the Kinesiology network, double-click the **Kines Network Login** icon and log in.
Laptop computer	Portable	VCR/ Laserdisk	1	1. Attach all cables and peripherals to the laptop **before** you turn **laptop** on. **Laptop owners must supply their own 15-pin VGA adaptor.** 2. Press **FN** (function) and **F7** (F8 on some laptops) until your image appears onscreen. 3. You **may** need to set laptop's screen resolution to 1024x768. Go to START > SETTINGS > CONTROL PANELS > DISPLAY > SETTINGS.
VCR/DVD player	VCR/DVD	VCR/ Laserdisk	1	
Visualizer	Visualizer	Visualizer	2	Plug visualizer's video cable into jack inside cabinet marked with orange tape.

Problems? Here's a checklist:

1. Is the **POWER STRIP** turned on?
2. Are all AV components turned on?
3. Are all settings (as listed above) correct for what you want to project?
4. Press the **input** button on the **REMOTE** a few times
5. Press the **mute** buttons on the **REMOTE**:
   If **pic mute** is on, you won't see an image
   If **audio mute** is on, you won't hear the sound
6. Restart the **COMPUTER**
7. Turn everything (including the **POWER STRIP**) off, then on.

Before you leave:

1. **If you're logged in, just log out.**
2. If you're the last instructor of the day, please **shut down** computer and turn off **POWER STRIP** inside cabinet. Put away **REMOTE** and lock cabinet.

Thank you!
