## Projection Inputs

Onscreen keyboard

Laptop  
NOTE: A classroom laptop allows you to interact fully with the SmartBoard.  
Non-classroom laptops can display on the SmartBoard, but you cannot edit or delete items. For full use of non-classroom laptops, please use AV jacks & cables along back wall.

Classroom pc

Volume controls

**Start-up Instructions**  
• Press the green Power button  to start the projector.  
• If the screen is blank, turn the computer on.  
• To start Notebook software, press .

Onscreen mouse

CD/DVD player  
(in cabinet)

SmartBoard  
crayons

**Start-up instructions.**

**Press the green button to start up.**

**Press the gray button to shut down.  
Hold button down until it beeps.**

## Desktop

## Networking

The SmartBoard's computer has a wireless card. If it's not working, you can plug it into a network jack using the room's ethernet cable.

To access the KIN network, touch or click the Novell login icon.

To sign out, touch or click the Novell logout icon.

Tapping an icon is like clicking a mouse.

# Recording & playback

1. Hit Record

2. Draw or write

3. Save file (.avi is default format)

4. Hit **Play** and it'll play it back  
**NOTE: delete AVI files after class.**

# Laptop Cabinet

Use key #2359 to open

Each laptop has a cubby assigned to it.  
Just match label on laptop to label over cubby.

**Note:** Because LabView is a costly program,  
it's loaded on Laptops #12-15 ONLY.

**Plug in power cord to recharge!**

# AV Jacks & Cables

...for your non-SmartBoard AV applications

Back wall, on either side of the window.
